I present the attached Notice of Impossibility of Physical Attendance and Mandatory Video Participation for filing in proceedings BON202500558, BON202500561, and BON202500269. This Notice preserves my rights and documents the impossibility created by the state and its agents. Physical attendance on 9 December 2025 is impossible under the danger, obstruction, and retaliation established in the record. Video participation is the only legal and lawful path forward under the current conditions.

The attached filing details the coercive advancement of the hearing date, the withdrawal of representation after my police report, the assaults carried out to block access to journalists and attorneys, the state-created danger, the silent deportation underway, the interference surrounding my case file, and the ongoing obstruction that prevents safe and lawful participation in an in-person hearing. I require English-language portal instructions and an English index of all documents on my case file. The Court already communicates with me in English, and access to the file requires full English instructions.

This filing enters the record immediately upon receipt. I preserve all rights and defenses.
